

**METHOD AND SYSTEM FOR REQUESTING AND PROVIDING
CONTENT FROM SERVER TO CLIENT VIA AN INTERMEDIARY SERVER**

5

ABSTRACT OF THE DISCLOSURE

A web-based platform that can support enhanced browsing is described. The web-based platform can make use of an intermediate server that receives requests destined for remote servers and performs processing on responses to the requests from the remote servers before returning the responses to the requestors. The enhanced browsing can be provided through browsing enhancement applications. The browsing enhancement applications can vary widely, and some examples of which include filtering or modifying content (e.g., HTML), cookie management, and history maintenance.
